

Site AEO Report — PEV (blueprint v1)

PEV: blueprint v1 — site covers 0/15 ideal pages (0.0%). 15 missing page(s), 4 thin cluster(s). 11 page(s) analyzed, avg 51.3%.

Coverage

Ideal pages	15
Covered	0 (0.0%)
Missing	15
Pages analyzed	11

Thin clusters

- ctem: 0/10 (need 10 more)
- continuous-validation: 0/10 (need 10 more)
- exposure-management: 0/10 (need 10 more)
- remediation: 0/8 (need 8 more)

Net-new content (missing pages, priority order)

Priority	Type	Slug	Seed question
0.9	pillar	/attack-surface-management	What is attack surface management?
0.9	pillar	/breach-and-attack-simulation	What is breach and attack simulation?
0.9	pillar	/ctem-program	How do you implement a CTEM program?
0.9	pillar	/ctem-vs-vulnerability-management	How is CTEM different from vulnerability management?
0.9	pillar	/kev-epss-prioritization	How do KEV and EPSS improve vulnerability prioritization?
0.9	pillar	/vulnerability-remediation-best-practices	What are vulnerability remediation best practices?
0.9	pillar	/what-is-continuous-validation	What is continuous security validation?
0.9	pillar	/what-is-ctem	What is Continuous Threat Exposure Management?
0.9	pillar	/what-is-exposure-management	What is exposure management?
0.9	pillar	/what-is-remediation-operations	What is remediation operations?
0.85	product	/platform	What does the Securin platform do?
0.8	solution	/ctem-tools	What tools support a CTEM program?
0.8	solution	/security-control-validation	How do you validate security controls continuously?
0.7	homepage	/	
0.4	contact	/contact	

Page rollout

Pages analyzed	11 (avg 51.3%)
By priority	{'high': 7, 'medium': 4}
By review	{'pending': 11}
